

DEMOLITION APPLICATION EXCAVATORS

TOUGH WORLD. TOUGH EQUIPMENT.

A POWERFUL VISION

Today, LiuGong is a leader in China's construction equipment industry and is one of the fastest growing construction equipment companies in the world, providing customers with quality, reliable support across a wide range of equipment.

WHAT MAKES LIUGONG A LEADER?

LiuGong built China's first modern wheel loader and continues to embrace its commitment to innovation by combining decades of know-how with leading technology from the world's best component suppliers.

LiuGong has established centers of excellence around the globe to guarantee service and support and ensure their customers can work efficiently and

productively. LiuGong manufacture at 20 plants and have offices across all major regions of the world including Europe, North America, South America, Asia-Pacific, India, the Middle-East, South Africa and Russia.

An extensive network of regional parts depots operate around the globe to ensure customers receive the support they have come to expect from LiuGong.

Innovation and manufacturing
excellence for almost 60 years

INNOVATIVE FROM THE START

Innovation drives industries forward and LiuGong has been **driving innovation for nearly 60 years.**

An 110,000m² Global Research & Development Centre in Liuzhou, China is equipped with world-class technology and run by industry experts including around 1,000 R&D engineers.

In addition to the Liuzhou facility LiuGong operates world-class R&D facilities in Poland, India, the United States and the United Kingdom, supporting their global vision of excellence.

Emphasis on quality is reflected in LiuGong's Six Sigma quality methodology and compliance with ISO 9000 standards.

LiuGong has established joint venture partnerships with some of the industry's best known names including:

- German drivetrain components manufacturer **ZF Friedrichshafen AG**
- Finnish mining and aggregates processing equipment manufacturer **Metso**
- North American diesel engine manufacturer **Cummins**

DEMOLITION APPLICATION

EXCAVATORS

BUILT TO DEMOLISH

Demolition is the first step of progress with some tough and unforgiving work. No matter the task; moving, sorting, loading and processing debris, LiuGong excavators excel in the arena of demolishing. LiuGong E Series Excavators are built for maximum performance on all types of demolition sites with features that enhance efficiency, durability & safety.

FUELWISE CUMMINS ENGINE

All equipped with world-class Cummins engines, LiuGong excavators meet the strict EU Stage 4 emissions standards while also delivering heavy-duty power without compromising on fuel economy.

The field proven engines feature cooled-EGR system and the latest AdBlue technology, complemented by Cummins' patented VGTTM Turbocharger which precisely adjusts the airflow delivered to the engine, increasing performance and ensuring excellent fuel efficiency.

ADVANCED HYDRAULICS

Within the advanced hydraulic system of LiuGong excavators, negative flow of the hydraulics optimizes the main control valve and helps to maximize the cycle time of the cylinders. This leads to improved efficiency and a higher rate of work completed. The hydraulic system is highly proficient in transferring engine power to the ground while providing precise control.

INTELLIGENT POWER CONTROL

LiuGong's advanced Intelligent Power Control (IPC) system delivers the power you need, when you need it, ensuring powerful performance without fuel wastage. The new-generation computer-aided IPC system utilizes the mechanical, electrical and hydraulic systems of the LiuGong Excavators to work in perfect harmony for quality, precise control. When the working load increases, engine power and hydraulic pump flow respond to meet the exacting demands of the job.

WORK YOUR WAY

LiuGong's six selectable work modes give you full control of the machine and enhanced performance under various operating conditions:

Power

Economy

Fine

Lifting

Breaker

Attachment

ALWAYS EFFICIENT

Automatic warm-up system brings the engine up to operating temperature swiftly, enhancing fuel consumption, reducing emissions and maximizing uptime.

E series excavators further increase fuel economy by regulating its idle speed. If there is no hydraulic request signal detected from the joystick, even for just one

second, the engine speed is automatically dropped by 100 RPM. If no activity is detected over three seconds the engine speed will decrease to idle. As soon as the system detects the hydraulic signal once more, the engine will immediately return to the previous throttle speed setting.

DEMOLITION APPLICATION EXCAVATORS

STRUCTURED FOR DEMOLITION

The use of thick, high-tensile steel components, internal baffling and stress-relieved plates, make the structures on Liugong E-series excavators strong and reliable.

We guarantee the quality and reliability of our machines throughout the manufacturing process by conducting rigorous tests and ultrasound inspections that identify defects well before they make it into production.

BOOM & ARM

Large cross-sectional supports incorporating one-piece steel castings are designed into the boom and arm structures. This solid engineering guarantees long-term durability and high resistance to torsional stresses. Standard rock-guard plates and vertical guards protect the arm in rocky digging conditions and tough work environments.

UPPER STRUCTURE

The upper structure is strongly reinforced by the use of an H-beam in the high cross section of the main structure providing even weight distribution and increased stability.

The platform's collision protection system has been welded into place to improve its strength, rigidity and overall service life.

The bolted on extra-heavy duty side protections on either side of the upper structure and heavy duty under covers that protect the upper structure for enhanced resistance to damage from debris help to withstand the extreme conditions of the demolition applications.

UNDERCARRIAGE

The high-strength undercarriage incorporates a welded X-frame construction for longevity and is designed to perform in the most challenging conditions. A long track beam and crawler system provides increased stability when using attachments for digging and truck loading. The result is superior strength and durability all around.

SAFETY BUILT IN

LiuGong's commitment to you includes an equal commitment to your safety. E-series excavators are equipped with all the necessary safety features to give you peace of mind and help you focus on the job at hand.

SAFETY STANDARDS

LiuGong excavators are certified to European CE standards and meet ISO safety standards.

ENHANCED VISIBILITY

The large glass surface area of the E-series cab, combined with the optional 360 degrees camera, provides an extraordinary view of the surroundings. This ensures the operator is always aware of the immediate environment, while adding LED work lights provides clearer vision on jobsites.

ROLL OVER PROTECTION SYSTEM

The cab's high-strength ROPS ensures operator protection in a worst-case scenario.

FALLING OBJECT PROTECTION SYSTEM

For the extreme environments of demolition sites, the Falling Object Protection (FOPS) is an invaluable addition to operator safety.

SAFE ENTRY

Safety rails and well-positioned anti-slip tape on the upper part of the machine make it easier and safer during machine servicing.

READY FOR PEAK PERFORMANCE

Demolition contract periods are now becoming shorter and shorter and legislation is more and more stringent. The E Series excavators are designed to get a lot of work done in a short amount of time. Featuring stronger boom, arm and bucket breakout forces, greater hydraulic flows, higher swing speeds and improved cycle times, these excavators will make light work of powering through the toughest demolition sites.

PROVEN PERFORMANCE

LiuGong makes it easy for even the most inexperienced of operators to be productive by harnessing the engine power across the six working modes of the excavator. Just select the mode that matches the work type and the job can be completed in quick time.

SMART HYDRAULICS

Load-sensing hydraulics direct the engine's power to ensure hydraulic pump flow continually adjusts for smooth, quick and efficient operation. It's where intelligence meets brute force. Engine power and hydraulic pump flow are automatically reset to adjust for the load attachment, helping to optimize the productivity of the machine.

RUGGED MACHINE DESIGN

Tough and reliable frame provides increased strength, reduced wear, and improved transmission of power to the ground.

ALWAYS VERSATILE

LiuGong's quick coupler and PowerLatch tilt coupler maximize your uptime by making changeover of attachments like buckets, breakers and shears, quick and simple.

TAKE CONTROL

Ergonomically designed controls, clear and informative displays, enhanced visibility, and outstanding comfort increases operator efficiency and safety. Add to that the easily accessed service points for critical daily servicing and routine maintenance and this machine is sure to be well looked after.

HARD WORK MADE EASY

Demolition application is one of the most exhaustive operations. We understand how operators like to work and have designed the cab to ensure maximum operator comfort, enhanced productivity and excellent visibility all-round.

AT HOME IN THE CAB

Large and spacious cab has all the key features to make excavator operation as safe and comfortable as possible while boosting operator efficiency shift after shift.

The E-series cab is designed to reduce noise and vibration, putting operators comfort first. Convenient additions include cup holders, an AM/FM radio and MP3 player, refrigerated storage and personal luggage compartment. The cab is also fitted with a roof skylight that can be opened or closed as the operator chooses.

ADVANCED CLIMATE CONTROL

An advanced climate control system creates the right environment in any weather, all year round, while dust is eliminated thanks to the complete sealing of the pressurized cab.

COMMAND & CONTROL

LiuGong has carefully designed the cab controls to be perfectly positioned, right where you need them. All hand and foot controls are precisely placed to allow for ease of access and operation. In addition, the multi-adjustable, air-suspension seat has an option for electric heating.

LARGE LCD MONITOR

The easy-to-read, full-color LCD monitor displays all the critical information you need about the machine, including working mode, hydraulic oil temperature, hydraulic pressure and service intervals.

ALL ROUND VISIBILITY

The cab features a large glass surface for exceptional jobsite visibility. With the addition of an optional 360 degree camera, the operator can safely see all around the machine.

EASY SERVICE COMES STANDARD

LiuGong excavators have been specifically designed for easy service and maintenance in even the most remote and harsh environments.

MAXIMIZE YOUR UPTIME

If servicing is easy, it gets done. An automatic greasing system makes daily maintenance simple and quick, helping to lower maintenance costs and improve machine productivity. The automatic system improves bearing life and reduces repairs by delivering regular and precise amounts of grease to each bearing. Optimal design and layout of all other maintenance features makes it easy for the operator to complete essential servicing tasks.

ON BOARD MONITORING

Using the LCD display, the operator can easily check oil temperatures and pressure levels, receive service interval alerts and access other information that contributes to simple maintenance and servicing of the machine.

E-Series excavators are designed with easily accessible service points:

- **Easily visible hydraulic oil level gauge**
- **Accessible, grouped filters**
- **Easy to replace A/C filter next to the cab door**
- **Maintenance free air filter**

PART OF YOUR PERFORMANCE

We know that confidence in your machine and those who support it is essential. So at LiuGong, we make sure we can always get what you need without delay, via our nine global parts depots, and the support of our network of local dealers across 130 countries worldwide.

LiuGong engineering sets high standards and all parts are rigorously tested to ensure they can meet the rigid quality specifications required for long lasting performance. No matter where you are in the world, we can ensure fast and efficient parts support to keep you going.

READY FOR ANY JOB

To ensure increased versatility on any jobsite, LiuGong provides a range of purpose designed attachments, hitches and tools for your excavator. In-cab dial-in hydraulic flow settings through the display screen optimizes the performance of your attachment.

WHERE YOU NEED US WHEN YOU NEED US

We are there, where you need us, when you need us. LiuGong is committed to providing you with tough equipment backed by dependable support you can count on.

GLOBAL NETWORK

LiuGong offers local support through an extensive dealer network in more than 130 countries. Our dealers and customers are supported by 10 regional subsidiaries and 9 global parts centers, all offering expert training, parts and service support.

PROFESSIONAL ADVICE

We are committed to reducing your total cost of ownership and increasing your profits. As part of this, LiuGong's experts will provide targeted advice on everything from choosing the right machine for your needs to maximizing its efficiency on site.

AFTERSALES EXPERIENCE

LiuGong supports you long after your purchase. With over 2,650 outlets, you can be confident we have the backup you need to maximize your machine's uptime whilst keeping your running costs down. A worldwide parts network will help make maintenance easy and parts available where and when you need them.

SERVICE AGREEMENTS

Take control of your costs by utilizing LiuGong's customer-focused service agreements. Talk to us today.

We are committed to reducing your total cost of ownership and increasing your profits.

SPECIFICATIONS

Operating weight 24,500 kg (54,013 lb)

Operating weight includes coolant, lubricants, full fuel tank, cab, standard shoes, boom, arm, bucket and operator 75 kg (165 lb).

Bucket capacity 1.0 m³ - 1.4 m³
(1.3 yd³ - 1.83 yd³)

ENGINE

Description

Cummins EPA Tier 4 final / EU Stage IV, 6-cylinder straight Variable-Geometry Turbocharger (VGT), high pressure common rail, electronically controlled direct injection. Air cleaner: Cummins direct flow air filter. Cooling system: Air-to-air intercooler

Emission rating EPA Tier 4 final / EU Stage IV

Engine manufacturer Cummins

Engine model QSB 6.7

Aspiration Variable-Geometry Turbocharger (VGT)

Charged air cooling Aftercooler

Cooling fan drive Viscous clutch

Displacement 6.7 L (1.8 gal)
6,700 cm³ (409 in³)

Rated speed 2,100 rpm

Engine output - net (SAE J1349 / ISO 9249) 119 kW (160 hp)

Engine output - gross (SAE J1995 / ISO 14396) 129 kW (173 hp)

Maximum torque 800 N·m (590 lbf·ft)
@1,500 rpm

Bore × Stroke 107 × 124 mm
(4.2" × 4.9")

UNDERCARRIAGE

Track shoe each side 49

Link pitch 190 mm (7.5")

Shoe width, triple grouser 700 mm (28")

Bottom rollers each side 9

Top rollers each side 2

SWING SYSTEM

Description

Planetary gear reduction driven by high torque axial piston motor, with oil disk brake. Swing parking brake resets within five seconds after swing pilot controls return to neutral.

Swing speed 11.4 rpm

Swing torque 78,200 N·m (57,677 lbf·ft)

HYDRAULIC SYSTEM

Main pump

Type Two variable displacement piston pumps

Maximum flow 2 × 224 L/min
(2 × 79.3 gal/min)

Pilot pump

Type Gear pump

Maximum flow 19 L/min (5 gal/min)

Relief valve setting

Implement 34.3/37.3 MPa
(4,975 / 5,410 psi)

Travel circuit 34.3 MPa (4,975 psi)

Slew circuit 25.5 MPa (3,698 psi)

Pilot circuit 3.9 MPa (566 psi)

Hydraulic cylinders

Boom Cylinder – Bore × Stroke $\Phi 120 \times 1,335$ mm
($\Phi 4.7" \times 4'5"$)

Stick Cylinder – Bore × Stroke $\Phi 135 \times 1,490$ mm
($\Phi 5.3" \times 4'11"$)

Bucket Cylinder – Bore × Stroke $\Phi 115 \times 1,120$ mm
($\Phi 4.5" \times 3'8"$)

ELECTRIC SYSTEM

System Voltage 24 V

Batteries 2 × 12 V

Alternator 24 V - 70 A

Start motor 24 V - 7.8 kW
(24 V - 10.5 hp)

SERVICE CAPACITIES

Fuel tank 420 L (111 gal)

Engine oil 25 L (6.6 gal)

Final drive (each) 5.5 L (1.5 gal)

Swing drive 3.4 L (0.9 gal)

Cooling system 25 L (6.6 gal)

Hydraulic reservoir 210 L (55.5 gal)

Hydraulic system total 330 L (87.2 gal)

DEF tank 35 L (9.2 gal)

SOUND PERFORMANCE

Interior Sound Power Level (ISO 6396) 69 dB(A)

Exterior Sound Power Level (ISO 6395) 100 dB(A)

DRIVE AND BRAKES

Description

2-speed axial piston motors with oil disk brakes. Steering controlled by two hand levers with pedals.

Max. travel speed High: 5.6 km/h (3.5 mph)
Low: 3.3 km/h (2.1 mph)

Gradeability 35°/70%

Max. drawbar pull 220 kN (49,458 lbf)

DIMENSIONS	
Boom	5,710 mm (18' 9")

MACHINE WEIGHTS AND GROUND PRESSURE

Shoe width	Operating weight	Ground pressure	Overall width
	6.2 m (20' 4") boom, 3.05 m (10') arm, 1.4 m ³ (1.83 yd ³) bucket, 5,500 kg (12,125 lb) counterweight		
700 mm (28")	33,000 kg (72,753 lb)	52.9 kPa (7.7 psi)	3,290 mm (10' 10")

SPECIFICATIONS

Operating weight 37,300 kg (82,232 lb)

Operating weight includes coolant, lubricants, full fuel tank, cab, standard shoes, boom, arm, bucket and operator 75 kg (165 lb).

Bucket capacity 1.6 m³ - 2.0 m³
(2.1 yd³ - 2.6 yd³)

ENGINE

Description

Cummins EPA Tier 4 final / EU Stage IV, 6-cylinder straight Variable-Geometry Turbocharger (VGT), high pressure common rail, electronically controlled direct injection. Air cleaner: Cummins direct flow air filter. Cooling system: Air-to-air intercooler.

Emission rating EPA Tier 4 final / EU Stage IV

Engine manufacturer Cummins

Engine model QSL9

Aspiration Variable-Geometry Turbocharger (VGT)

Charged air cooling Aftercooler

Cooling fan drive Viscous clutch

Displacement 8.9 L (2.35 gal)
8,900 cm³ (543 in³)

Rated speed 2,000 rpm

Engine output - net (SAE J1349 / ISO 9249) 209 kW (280 hp)

Engine output - gross (SAE J1995 / ISO 14396) 221 kW (296 hp)

Maximum torque 1,451 N·m (1070 lbf·ft) @1,400 rpm

Bore × Stroke 114 × 145 mm (4.5" × 5.7")

UNDERCARRIAGE

Track shoe each side 48

Link pitch 216 mm (8.5")

Shoe width, triple grouser 700 mm (28")

Bottom rollers each side 9

Top rollers each side 2

SWING SYSTEM

Description

Planetary gear reduction driven by high torque axial piston motor, with oil disk brake. Swing parking brake resets within five seconds after swing pilot controls return to neutral.

Swing speed 10 rpm

Swing torque 111,000 N·m (81,132 lbf·ft)

HYDRAULIC SYSTEM

Main pump

Type Two variable displacement piston pumps

Maximum flow 2 × 300 L/min (2 × 79.3 gal/min)

Pilot pump

Type Gear pump

Maximum flow 19 L/min (5 gal/min)

Relief valve setting

Implement 34.3/37.3 MPa (4,975 / 5,410 psi)

Travel circuit 34.3 MPa (4,975 psi)

Slew circuit 26.2 MPa (3,800 psi)

Pilot circuit 3.9 MPa (566 psi)

Hydraulic cylinders

Boom Cylinder – Bore × Stroke Φ 140 × 1,505 mm (Φ 5.5" × 4' 11")

Stick Cylinder – Bore × Stroke Φ 170 × 1,785 mm (Φ 6.7" × 5' 10")

Bucket Cylinder – Bore × Stroke Φ 145 × 1,220 mm (Φ 5.7" × 4')

ELECTRIC SYSTEM

System Voltage 24 V

Batteries 2 × 12 V

Alternator 24 V - 70 A

Start motor 24 V - 7.8 kW (24 V - 10.5 hp)

SERVICE CAPACITIES

Fuel tank 620 L (163.8 gal)

Engine oil 30 L (7.9 gal)

Final drive (each) 9.5 L (2.5 gal)

Swing drive 10.5 L (2.8 gal)

Cooling system 37 L (9.8 gal)

Hydraulic reservoir 240 L (63.4 gal)

Hydraulic system total 450 L (118.9 gal)

DEF tank 35 L (9.2 gal)

SOUND PERFORMANCE

Interior Sound Power Level (ISO 6396) 75 dB(A)

Exterior Sound Power Level (ISO 6395) 105 dB(A)

DRIVE AND BRAKES

Description

2-speed axial piston motors with oil disk brakes. Steering controlled by two hand levers with pedals.

Max. travel speed High: 5.5 km/h (3.4 mph)
Low: 3.4 km/h (2.1 mph)

Gradeability 35%/70%

Max. drawbar pull 320 kN (71,939 lbf)

Unit: mm

DIMENSIONS

Boom	6,400 mm (21')
Arm Options	3,200 mm (10' 6")
A Shipping Length	11,167 mm (36' 8")
B Shipping Height – Top of Boom	3,530 mm (11' 7")
C Track Gauge	2,590 mm (8' 6")
D Undercarriage Width – with 700 mm (28") Shoes	3,290 mm (10' 10")
E Length to Center of Rollers	4,050 mm (13' 3")
F Track Length	4,944 mm (16' 3")
G Overall Width of Upper Structure (including protective side beam)	3,227 mm (10' 7")
H Tail Swing Radius	3,500 mm (11' 6")
I Counterweight Ground Clearance	1,172 mm (3' 10")
J Overall Height of Cab (with protective equipment)	3,318 mm (10' 11")
K Min. Ground Clearance	532 mm (1' 9")
L Track Shoe Width	700 mm (28")

BOOM DIMENSIONS

Boom	6,400 mm (21')
Length	6,692 mm (21' 11")
Height	1,980 mm (6' 6")
Width	813 mm (2' 8") with boom hinge pin 1,025 mm (3' 4")
Weight	3,250 kg (7,165 lb)

Cylinder, piping and pin included.
Boom cylinder pin excluded.

ARM DIMENSIONS

Arm	3,200 mm (10' 6")
Length	4,376 mm (14' 4")
Height	1,055 mm (3' 6")
Width	652 mm (2' 2") (with hinge pin)
Weight	1,880 kg (4,145 lb)

Cylinder, linkage and pin included.

MACHINE WEIGHTS AND GROUND PRESSURE

Shoe width	Operating weight	Ground pressure	Overall width
	6.4 m (21') boom, 3.2 m (10' 6") arm, 1.6 m ³ (2.1 yd ³) bucket, 6,500 kg (14,330 lb) counterweight		
700 mm (28")	37,300 kg (82,232 lb)	59.6 kPa (8.6 psi)	3,290 mm (10' 10")

DEMOLITION APPLICATION EXCAVATORS

924E / 928E / 933E / 939E

WORKING RANGE

		924E	928E	933E	939E
Boom		5,710 mm (18' 9")	6,000 mm (19' 8")	6,200 mm (20' 4")	6,400 mm (21')
Arm		2,900 mm (9' 6")	2,980 mm (9' 9")	3,050 mm (10')	3,200 mm (10' 6")
A. Max. digging reach		9,870 mm (32' 5")	10,340 mm (33' 11")	10,300 mm (33' 10")	10,240 mm (33' 7")
B. Max. digging reach on ground		9,685 mm (31' 9")	10,150 mm (33' 4")	7,265 mm (23' 10")	7,160 mm (23' 6")
C. Max. digging depth		6,562 mm (21' 6")	6,925 mm (22' 9")	7,300 mm (23' 11")	7,340 mm (24' 1")
D. Max. digging depth, 2.44 m (8') level		6,390 mm (21')	6,675 mm (21' 11")	7,096 mm (23' 3")	7,180 mm (23' 7")
E. Max. vertical wall digging depth		5,080 mm (16' 8")	5,795 mm (19')	6,216 mm (20' 5")	6,460 mm (21' 2")
F. Max. cutting height		9,945 mm (32' 8")	9,940 mm (32' 7")	4,040 mm (13' 3")	4,465 mm (14' 8")
G. Max. dumping height		7,170 mm (23' 6")	6,920 mm (22' 8")	10,453 mm (34' 4")	10,900 mm (35' 9")
H. Min. front swing radius		3,090 mm (10' 2")	3,695 mm (12' 1")	10,653 mm (34' 11")	11,100 mm (36' 5")
Bucket Digging Force (ISO)	Normal	140 kN (31,473 lbf)	165 kN (37,093 lbf)	187 kN (42,039 lbf)	232 kN (52,156 lbf)
	Power Boost	152 kN (34,171 lbf)	179 kN (40,241 lbf)	203 kN (45,636 lbf)	252 kN (56,652 lbf)
Arm Digging Force (ISO)	Normal	97 kN (21,806 lbf)	124 kN (27,876 lbf)	137 kN (30,799 lbf)	170 kN (38,218 lbf)
	Power Boost	105 kN (23,605 lbf)	134 kN (30,124 lbf)	149 kN (33,497 lbf)	185 kN (41,590 lbf)
Bucket Capacity		1.0 m ³ (1.31 yd ³)	1.2 m ³ (1.57 yd ³)	1.4 m ³ (1.83 yd ³)	1.6 m ³ (2.1 yd ³)
Bucket Tip Radius		1,450 mm (4' 9")	1,540 mm (5' 1")	1,606 mm (5' 3")	1,687 mm (5' 6")

STANDARD EQUIPMENT

ENGINE SYSTEM

- Cummins diesel engine, turbocharged, inline 6-cylinder, 4 stroke, water cooled
- Auto-idle speed control
- Air filter with pre-cleaner
- Engine oil filter
- Pre-filter with water separator
- Radiator, oil cooler and intercooler
- IPC (Intelligent Power Control) System
- Engine overheating prevention system
- Electrical fuel refilling pump

DRIVETRAIN

- Hydraulic motor, one-piece two-gear piston and reducer
- 2-speed travel system with automatic shift

SWING SYSTEM

- High-torque piston swing motor with integral spring set and automatic hydraulic release swing brake

HYDRAULIC SYSTEM

- Main pump: two variable displacement piston pumps, ready for PTO
- Pilot pump: gear
- Cylinders: boom, stick, bucket
- Power boost function
- Boom and arm regeneration circuits

- Pilot oil filter
- Load holding valve
- Pilot control shut-off lever
- Hose burst safety valves, prevention of boom or arm supply dropped when the lines split (2 mounted on boom cylinders, 1 on arm cylinder)
- 6-working mode selection system: Power, Economy, Fine, Lifting, Breaker, Attachment

OPERATOR STATION

- Pressurized and sealed cab with all-around visibility, large roof window with slide sliding sun visor, front window wiper and removable lower window
- Roll-Over Protective System (ROPS)
- Skylight rooftop
- Air conditioner, heater, defroster
- Swing parking brake
- AM/FM Radio with MP3 audio jack
- Glass-breaking hammer
- Ashtray, cigarette lighter
- Cup holder
- Floor mat
- Storage box
- Fire extinguisher
- Rear view mirrors
- One key for all locks
- Travel alarm
- Rear view camera 5.7" monitor
- Air suspension seat
- Control joysticks with 2 switch & 1 proportional

INSTRUMENTATION

- Color LCD monitor with alarms, filter/fluid change, fuel rate, water temperature, work mode, fault code, working hour, etc.
- Fuel gauge
- Hydraulic oil level gauge

ELECTRICAL

- Alternator 70 A
- Dual batteries 12 V
- Working lights, 1 frame mounted, 2 boom mounted
- Rotating beacon
- Starting, 24 V

GUARDS

- Belly guards
- Cover plate under travel frame
- Track shields

OTHER STANDARD EQUIPMENT

- Maintenance tool kit
- Maintenance parts package

STANDARD DEMOLITION EQUIPMENT

HYDRAULIC SYSTEM

- Control pattern change valve
- Hydraulic lines:
 - Breaker & shear
 - Slope & rotator
 - Grapple
 - Quick coupler line
- Overloading valve
- Cushion valve

GUARDS

- Cab guard (including cab front and top guard, bar)
- Belly guard and 8 mm thickness platform bottom plate
- Bucket ram guard
- Boxing ring

OPTIONAL EQUIPMENT

HYDRAULIC SYSTEM

- Oil drain line
- Hydraulic quick coupler

OPERATOR STATION

- Power outlet 24 V to 12 V converter
- 4 LED cab top lights
- Working lights on cab (2 on top-front cab)
- Rain visor
